UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the May/June 2011 question paper for the guidance of teachers

0417 INFORMATION AND COMMUNICATION TECHNOLOGY

0417/22

Paper 2 (Practical Test A), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Export facilities at Port Pepard

New developments reporte

Location of Port Pepard

The Northwest region country has a long coast line of over two thousand kilometres as visting ports in over forty locations. Many of these traditional ere unsuited to the large container ships or bulk carriers sites have been found for developing several new m the massive ships required by today's New subhead entered and formatted is Pepard on the south eastern coa Subheads identified and formatted 12 pt italic, sans serif, centred been developed specifically to handle the of cars. These have been built to meet national and world demands for small, economical and environmentally friendly, family transport. Text moved 1 mark

One of the unique features of Port Pepard is the availability of large tracts of land. This is attractive to several customers who wish to set up tank farms or warehouse facilities on site. A car storage facility is built here while awaiting shipping. Cars will be brought in by rail and loaded into containers in a newly developed con-Text deleted 1 mark

The Waterfront

er in Port Pepard.

Port Pepard offers a total quay length of 1075 metres and accepts vessels of up to 14 metres draft. There is an ondock rail facility with dedicated sidings to handle containers, bulk and break-bulk cargo. It also offers extensive back-up infrastructure, including warehousing facilities, open stack vards, weigh bridges and dedicated rail sidings.

Excellent Connectivity

Port Pepard is well connected by road and rail to the rest of the country. It is directly connected by the broad gauge rail network of the National Railways. Port Pepard has set up a joint venture with the National Railways – Pepard Rail Corporation Limited, making it possible to offer the most competitive rail freight and transit times in the western coast. New links have also been developed with new Page 3 Mark Scheme: Teachers' version Syllabus Paper
